

SIMATS ENGINEERING
ASSESSMENT TOOL 3: MCQ Test

COURSE NAME: Cloud Computing and Big Data Analytics **COURSE CODE:** CSA15

COURSE OUTCOME COVERED

CO3: *Implement cloud-based solutions using cloud storage, web APIs, and platform services for real-world applications. (BL3)*

Assessment Tool Weightage: 10%

Dave's Taxonomy: Precision (Level 3)
Question Count: 15

Total Marks: 30

Code of Conduct

I **Maddirala Gopi Krishna Reddy 192372055** Name / Reg No) certify that this submission is my original work and that I have adhered to the guidelines specified for this assessment. I understand that any violation of academic integrity rules will result in disciplinary action.

Assessment Tasks

MCQ Test

1. Which cloud storage model is best suited for storing virtual machine disks?

- A. Object storage
- B. Block storage
- C. File storage
- D. Archive storage

Answer: B. Block storage

2. Which protocol style is widely used for lightweight web APIs in cloud platforms?

- A. SOAP only
- B. REST
- C. FTP
- D. SMTP

Answer: B. REST

3. Serverless computing is best described as:

- A. Computing without networks
- B. Running code without managing servers directly
- C. Local execution only
- D. Batch-only processing

Answer: B. Running code without managing servers directly

4. Edge computing primarily helps by:

- A. Increasing central storage only
- B. Reducing latency near data sources
- C. Eliminating internet access
- D. Replacing cloud storage fully

Answer: B. Reducing latency near data sources

5. Fog computing differs from edge computing because it:

- A. Always runs inside sensors
- B. Introduces an intermediate distributed layer between edge and cloud
- C. Works only in private clouds
- D. Uses no network resources

Answer: B. Introduces an intermediate distributed layer between edge and cloud

6. Which storage model is commonly used for shared departmental files?

- A. File storage
- B. Register storage
- C. Cache-only storage
- D. Tape-only storage

Answer: A. File storage

7. A browser calling a cloud web application typically communicates through:

- A. BIOS interrupts
- B. Web APIs
- C. Only command-line tools
- D. VPN tunnels only

Answer: B. Web APIs

8. SAN stands for:

- A. Secure Access Node
- B. Storage Area Network
- C. Shared Application Namespace
- D. Service Access Network

Answer: B. Storage Area Network

9. Which of the following is a common benefit of serverless architecture?

- A. Manual scaling of servers
- B. Pay-per-use execution model
- C. Dedicated physical hardware ownership
- D. No monitoring required

Answer: B. Pay-per-use execution model

10. Collaboration within the cloud usually improves:

- A. Shared access to services and documents
- B. Hardware disposal speed
- C. Cable management
- D. BIOS configuration

Answer: A. Shared access to services and documents

11. Which one is an example of a platform service?

- A. Managed application runtime
- B. Keyboard driver
- C. Physical rack switch only
- D. Local USB storage

Answer: A. Managed application runtime

12. Object storage is generally preferred for:

- A. Mounting OS boot volumes
- B. Large unstructured cloud data such as images and backups
- C. CPU scheduling
- D. Hypervisor installation

Answer: B. Large unstructured cloud data such as images and backups

13. Which component allows applications to communicate programmatically with cloud services?

- A. Heat sink
- B. Web API
- C. Mouse driver
- D. Compiler cache

Answer: B. Web API

14. A low-latency smart factory use case is best supported by:

- A. Edge computing
- B. Cold archive only
- C. Offline storage
- D. Manual processing

Answer: A. Edge computing

15. Which one is not a typical cloud access method?

- A. Browser-based access
- B. API access
- C. Platform console access
- D. Paper-based access

Answer: D. Paper-based access
